**Clayton:** Working for FISH is the best decision I've ever made.

**My name is Clayton and I've been working for FISH since 2009.**

**I didn't really have a serious career before FISH. I worked at a gym and did that in the evenings and I cleaned windows during the summer time in between school semesters. I ended up liking it and liking the schedule and no nights, no weekends, kept me around after college.**

**Clayton:** Nobody needs experience. The training that they provide us is awesome. Anybody can come out being a window cleaner after the two-week training that they give us.

**Haley:** Before I started working here, I didn't really have a clue on how to clean windows like just getting the spray bottle with a napkin doesn't really do the job.

**Turns out it's pretty easy to learn.**

**Nate:** It's very flexible I mean most FISH franchises out there, you have options you can go get more work once you're done or you just go home and enjoy the rest of your day. I have another job you know I'm a bartender and this works out perfectly for me.

*Nate and Haley continuing cleaning home's windows and packing up equipment into branded vehicle.*

**Haley:** And I take night classes two days a week. It really frees up enough time so I can work on my schooling.

*Clayton walks around branded vehicle to open rear doors and get cleaning equipment.*

**Clayton:** I have a lot of pride my work because I'm able to clean up the storefront. That's the first impression you see at a location and it's awesome because I'm a big part of that.

I typically get to the office first thing in the morning. The manager will give me my workload for the day, whatever my quota is. When I get done with the work that I have provided for me I can go out and do sales if I want to. There's tons of opportunities to make more money.

*Clayton gets out of personal vehicle in a snowy environment and walks around back to get cleaning equipment. Clayton walks through snow and cleans commercial storefront windows.*

**Clayton:** We clean all year long because a lot of the storefronts get covered up with the salt and debris from the roads. We need to make sure their businesses stay clean throughout the year. So how we keep the water from freezing is windshield wiper fluid. Same stuff that goes in your car. It won't freeze on the windows so you're able to mop and squeegee the windows with no problem. Cleaning in the winter is just as easy as cleaning in warmer weather. The waterproof gloves so your hands don't get wet. You've got the proper layers on, you're only outside for you know 10-15 minutes and then you're going back inside to warm up and then you're back in your car in your warm car to your next job.

*Nate and Haley driving a branded vehicle.*

**Haley:** What made you want to start working for FISH?

**Nate:** A friend of mine told me about FISH and I applied, I got hired, didn't need a college degree or anything like that and they trained me on everything I needed to know.

**Haley:** It's definitely a nice financially stable job that doesn't require much experience.
